Encl: as above

## **Coal India logs 30% production growth in May'22**

Accelerating its production Coal India Limited (CIL) posted a strong 30% output growth in May'22. The increase in volume terms was 12.6 million tonnes (MTs). The company produced 54.7 million tonnes (MTs) of coal during the month compared to 42.1 MTs in May'21.

During the first two months of FY'22, CIL produced 24.2 MTs more coal than what it did in the same period a year ago. This represents a healthy 29% growth.

CIL's production increased sharply to 108.2 MTs, till May'22 of the ongoing fiscal year, against 84 MTs for comparable period in FY'21.

All the coal producing subsidiaries of CIL have achieved growth for the month as well as progressive up to May'22.

Facing a production target of 700 MTs in FY'23, which entailed 12.4% growth rate at the beginning of the fiscal, CIL brought down the year's asking growth rate to 9.9% by the end of May'22.

"Admittedly, sustaining the level of growth witnessed so far, throughout the year, is difficult but we will be monitoring the progress month by month to augment the output" said a senior official of the company

Even amid an unrelenting elevated demand for coal, CIL supplied 52.4 MTs to power sector in May'22 with a high growth of nearly 18% over last year's May. Supplies to the utilities during May'21 was 44.5 MTs.

During May'22, CIL's despatch to power sector at an average of 1.69 MTs per day was higher the demand of 1.65 MTs. This helped the stock at power plants, having linkage with CIL, go up by 16,000 tonnes per day during the month.

Concurrently, CIL supplies to thermal power plants jumped to 102.2 MTs till May'22 scoring a strong 16.7% growth over April-May'21. It means the company stepped up its coal despatch by 14.6 MTs more to this sector compared to 87.6 MTs of same period FY'21. CIL's supplies during this period at 1.675 MTs/per day was 100% of the demand.

CIL's total off-take for May'22 was 61.2 MTs compared to 55 MTs of previous year's May achieving 11.3% growth. Whereas the growth in total off-take for April-May'22 was 8.7% with the company shoring up its supplies to 118.7 MTs. Off-take for similar period last year was 109.2 MTs.

CIL was able to liquidate the coal stock at its end by 10.4 MTs from a level of 60.6 MTs at the beginning of the year to 50.2 MTs as of end May'22.
